We've been working closely with Whipple for the past year to design a unique right hand version kit and tune software to suit our Australian ECU's, Australian fuels and Australian conditions.

The result is the most efficient straight Bolton kit available including the only plug and play calibrated tune to suit. (All other kits require grinding, cutting and modifying of the engine block, timing cover and K brace support) (All other kits do not include tuning and require the ECU to be unlocked then calibrated costing up around \$1,500-\$1700). Being the only Authorised Whipple Distributor, we provide a full 12 month Manufacturers Warranty and tech support. All Stage#1 kits are ADR Compliant able with our supplied flash tune and standard exhaust.

## STAGE #1

- (Standard Engines)
- Full comprehensive kit to suit AUS delivered Mustangs
  - Intercooled Black Front Feed 2.9L Whipple Compressor
  - CNC billet adaptor to run factory throttle
  - CAI sealed Hi-flow air box and pod filter assembly
  - Billet HD tensioner and in loop 6rib drive.
  - 58lbs Hi-Flow injectors and iridium plugs
  - Whipple stand-alone Flash Tool w/ custom Tune Calibration.
  - 8-10PSI

## STAGE #2

- (Modified Engines)
- Full comprehensive kit to suit AUS delivered Mustangs
  - Intercooled Black Front Feed 2.9L Whipple Compressor
  - 132mm Billet Oval Throttle Body
  - Oval to round 4" Hi-flow intake and MAF.
  - CAI sealed air box and pod filter assembly
  - Billet HD tensioner and in loop 6rib drive.
  - 72lbs Hi-Flow injectors and iridium plugs
  - Whipple stand-alone Flash Tool w/ custom Tune Calibration.
  - 10-12PSI
